

UrS4/S6 R134/R12 Air conditioning comparison

The 1992-1995 Audi S4/S6 was delivered with two different air-conditioning (AC) systems from the factory. The early cars, 1992 and some 1993 models were delivered with an AC system that utilizes R12 refrigerant. Later 1993 model S4's up to the 1995.5 S6 were equipped with an AC system utilizing R134 refrigerant. These two AC systems utilized different AC condensers, which can be seen in the pictures below. When ordering an Apikol front mounted intercooler (FMIC) for your UrS4/S6 it is necessary to specify which AC system your car has so the appropriate mounting brackets can be included in your kit.

R134 style air conditioning

R12 style air conditioning
